Cybersecurity Services

_____

The cybersecurity landscape is rapidly evolving and software, systems, and networks are increasingly vulnerable to malicious activities and threats. Finding a strategic Cybersecurity partner to identify, measure, and prioritize your unique security strategy can seem like an overwhelming endeavor.

Overview

At G2 Ops, we build trusted security partnerships with our clients. We offer a full suite of Cybersecurity Services to help clients understand their security needs. Whether a new business just getting started or an experienced organization seeking greater risk management strategies, our team of seasoned Analysts and Engineers will lay the groundwork for establishing a mature security culture.

G2 Ops Cybersecurity Services:

- Governance, Risk, and Compliance (GRC)
  - Cybersecurity Maturity Model Certification (CMMC) Readiness
  - DoD Assessment and Supplier Performance Risk System (SPRS) Support
  - NIST SP 800-171
- Industrial Control Systems (ICS) Cybersecurity
- Information Security Program Development and Maturity
- Risk and Security Assessments and Training
- Risk Management Framework (RMF) Compliance and DCSA Authority to Operate (ATO) Support

Our focus on business outcomes provides prioritized mitigation strategies, leads to mature security programs, and reduces the potential for exposure to financial loss, brand damage, and business interruption for our clients.

G2 Ops provides cybersecurity solutions and services to critical defense and commercial industry.

Cybersecurity Impact Methodology

Our business-first approach to building security programs is based on decades of combined experience and expertise in cybersecurity. Our methodology unifies business practices and security standards within the organizations we serve.

In developing a security partnership, our first goal is to **Identify** how your existing security program can support your business, not disrupt it. Secondly, we will **Measure** your existing security posture against proven security frameworks. Next, we will **Prioritize** your mitigation strategies based on the effect to your business. Lastly, we will guide you to **Act** on mitigation strategies to help mature your security program.
