

G2 Ops Lands Early Spot on IHR 200 List of Companies to Watch

Virginia Beach, VA, USA (20 April 2026) – G2 Ops, a leading provider of digital engineering and Model-Based Systems Engineering (MBSE), has been recognized as one of the region’s most promising companies in Innovate Hampton Roads’ inaugural IHR 200 – a curated list that will highlight the 200 independent, high-potential businesses shaping the future of the Hampton Roads economy. G2 Ops was among the first 20 organizations to be added to the growing list.

Announcing the inspiration for the novel list, Executive Director of Innovate Hampton Roads Tim Ryan explained, “For years, one of the most common questions we’ve been asked is simple, who are the companies we should be paying attention to? There was no clear answer. The IHR 200 changes that. It’s a curated list of the most important privately owned companies in Hampton Roads, built so when people ask who could become the next Google, SpaceX, or Coca-Cola, we have a real answer.”

The IHR 200 comprises private companies across diverse industries that demonstrate the capacity to grow, compete, and emerge as leaders in their respective markets. The list spans a wide range of industries and features businesses in various stages of development – from startups to industry leaders scaling high.

G2 Ops has experienced sustained double-digit growth year after year including an explosive 111% increase from 2021-2024. As future defense partners continue to turn to digital engineering and MBSE for solutions, G2 Ops is poised to deliver mission-critical solutions at scale.
